

Coffee Sales Analysis Report:

1. Project Overview:

This project focuses on analysing coffee sales data using Microsoft Excel. The goal of the project is to understand sales trends, customer purchasing behaviour, and product performance by creating an interactive dashboard. The dashboard helps in identifying best-selling products, high-value customers, and country-wise sales to support better business decisions.

2. Tools Used:

Microsoft Excel – Data cleaning, formulas, pivot tables, and dashboard.

3. Dataset Summary:

- **Total Records:** 1,001
- **Total Columns:** 16

Key Features Include: Each row represents one order with product, customer, and sales details.

Data Quality: No missing value found. Use Excel formulas like if, xlookup, index-match to adjust the sheet for better quality. Use pivot table and charts to analysis total orders, total sales, loyalty customer percentage, most popular coffee, sales over time, top customers, sales by country, also use timeline, slicer, sorting for better analysis and Visualization.

4. Dashboard in Excel:

5. Business Recommendations:

- Increase promotion of high-selling coffee products.
- Introduce offers for loyalty card customers to improve retention.
- Target high-value customers with special discounts.
- Improve sales strategy in low-performing countries.
- Monitor sales trends regularly for better planning.
